SUMMARY

Computer Science Graduate passionate about **Java Full Stack Development** with strong expertise in Frontend (HTML, CSS, JavaScript, React) and Backend (Java, Node.js). I have practical experience through internships and real-world projects, including a UI/UX internship at **Vacons Technologies**, where I contributed to frontend design and user experience improvements. I enjoy building clean, efficient, and scalable web applications that provide seamless user experiences.

SKILLS

Programming Languages	Java, C++
Frontend Development	HTML, CSS, JavaScript, Bootstrap, React
Backend Development	Java
Database	MySQL
Other Tools	Git, GitHub, flutter

PROJECTS

Meal Finder Website	HTML, CSS, JavaScript, API
Built a meal search web application integrating external APIs to fetch and display real-time data. [GitHub] [Live Demo]	
E-commerce Website	HTML, CSS
Developed a responsive static e-commerce website focusing on clean UI/UX and structured layouts. [GitHub] [Live Demo]	
Face Recognition Attendance System	Python, OpenCV
Created a webcam-based face recognition system to automate attendance tracking for students.
